

STI Releases “S207” Limited-Edition “WRX STI” in Japan

Tokyo, October 28, 2015 – Subaru Tecnica International (STI),*¹ the motorsports division of Fuji Heavy Industries, will launch a limited-edition model based on the “WRX STI” on December 1, 2015. Just 400 units of the model, dubbed the “S207”, will be available.

Taking the WRX STI as its base, this complete car from STI features exclusive engine and suspension tuning as well as distinctive interior and exterior design. Embracing the STI concept of offering the ultimate in road driving, the S207 stands at the pinnacle of the STI complete car lineup and aims to be the world’s most enjoyable vehicle, providing a feel-good experience to all those who travel in it regardless of road conditions and enhancing driver skill.

Special engine tuning boosts maximum power output to 328 PS. Handling is enhanced by a quick steering-gear ratio of 11:1, the addition of original STI components including a flexible tower bar, DampMatic® II front suspension with adjustable damping (a first for a Japanese automaker), and front-rear Active Torque Vectoring, all of which combine to achieve a strong yet flexible ride and sharp cornering. Driving performance has also been enhanced with Brembo 6-pot brakes in front and 4-pot brakes at the rear, both featuring monoblock opposed-piston brake calipers and drilled rotors (2-piece type in front); specially designed 255/35R19 tires; and an exclusive large front spoiler. Special design elements serve to heighten driver anticipation and the joy of ownership, from the rear-bumper air outlet on the exterior to exclusive STI-spec Recaro front bucket seats and customized sports instruments on the interior.

Evoking the spirit of the Nürburgring 24-Hour Race, where the WRX STI continues to vie for honors, an “NBR Challenge Package” is also available (limited to 200 units), featuring an exclusive dry carbon rear spoiler and an ornament commemorating Subaru’s victory in the SP3T class*² in the 2015 Nürburgring 24-Hour Race.

The S207 is available in three body colors: WR Blue Pearl, Crystal White Pearl, and Crystal Black Silica. Additionally, a 100-unit limited run of the “NBR Challenge Package Yellow Edition” in vivid Sunrise Yellow will be on offer as a special model.

The S207 must be ordered by March 6, 2016,*³ and sales are limited to 400 units.

*1: Subaru Tecnica International Inc. (President: Yoshio Hirakawa; Mitaka, Tokyo)

*2: A class for turbocharged vehicles up to 2 liters.

*3: The Yellow Edition must be ordered by November 30, 2015.

S207 NBR Challenge Package Yellow Edition

S207
